SUPPORT OUR TROOPS

To: BFPE International
President Pamela Boyer

Subject: United Veterans Beacon House: Promise SD

Dear President Boyer,

I am writing to you in despair. As you can see just from the emails I have sent, let alone the faxes and phone messages left and never returned.

I am not interested in getting someone in trouble, just getting Homeless Veterans Housed and they should have been housed before winter not still be waiting for answers.

This goes back to July/Aug 2012 when one of our Board Members and a Master Contractor contacted BFPE for us, passed on information and then left it to Jim and myself to complete it.

The sprinkler plans were sent from the Norfolk Architects and then for some reason I had to send paper sets I had and the drama just keeps going.

I am sick of the non-return of calls. I left messages, faxes and emails. The replies are few and far between. I called again last week and got the lady on the phone and she said she would put me through to Jim, then after 3 or 4 minutes she came back and told me Jim couldn't be at his desk. So I left a message. I had informed him of my phone number up till the 23rd and as I was travelling to SD I provided that number. Here is a week later and I am no further advances.

I already told Jim after frustration that if BFPE didn't want the work then just let me know and I would go somewhere else.

So here we over 6 months down the track and I still do not have any answer and due to that I can not open The United Veterans Beacon House in Promise, SD.

No you are not the only thing holding us up, A fire alarm technician was suppose to come out and check all the smoke detectors, pull stations and Main control box now three time and each time he has never turned up. We have paid his Airfares and have his equipment here and quite frankly I don't see this happening either.

People must really Revere Veterans as it is so difficult to get tradesmen to help.

President Boyer, I need to know if BFPE is interested in providing the information and selling the Equipment or do I need to go somewhere else?

We have other United Veterans Beacon Houses being constructed mainly by Volunteers and we need more Fire Systems as No Transitional House for Veterans can be without a Sprinkler and Fire Alarm System.

If you would like to talk to me I will be in Promise, SD on the 605 number until the 4th of February and then I am heading to one of Our Veterans Posts in Thibadeaux, LA and can be contacted on

There is not much else to say, Veterans need our help to turn their lives around and after already sacrificing so much, we should not give them that chance.

If you want to know more about us check us out: vfus.us

I hope we can get an answer one way or the other. Thanks for your time.

My phone is 570 . Thanks for time.

Sincerely

Peter J Forbes
President
